

Serum multivit

con Vitamina C, E, F
y proteoglicanos

MULTIVIT SERUM

USE

Facial

NORMAL AND DRY SKIN

LOST TONE SKIN

ACTION

Antioxidante
Antiaging
Antiradicalar
Moisturizing
Regenerating

FORMAT

Serum 30 mL

Vitamins usually act by activating our vital systems, protecting the cell membranes, strengthening skin resistance, acting on intercellular exchanges and delaying cellular aging.

Vitamin C

Vitamin C is essential in the synthesis of collagen: its absence causes the formation of a defective collagen that is reflected in a brittle and elastic skin. In cosmetics it brings more clarity to the skin, contributes to the elimination of hyperpigmentation, for that reason it is included in depigmentive protocols. Properties:

- ⇒ **Antiradicalar** thanks to its antioxidant action neutralizes the harmful effects of free radicals, the main responsible for skin aging.
- ⇒ **Pro-moisturizing** because regenerates the vitamin E of the skin degraded by free radicals, allowing it to fully develop its moisturizing, antioxidant and skin repairing activity.
- ⇒ **Action on the elasticity of the skin** by delaying the loss of elasticity due to the oxidation of the lipids which in turn favor the deterioration of the elastic fibers of the skin.

Vitamin E

Vitamin E has great effectiveness in the regeneration of the skin, so products rich in this vitamin are recommended after a peeling either physical or chemical. In addition it acts as synergist in the action of vitamin C as anti-free radicals, has a high activity as an antioxidant.

Multivit Serum

Vitamin F

Vitamin F is not exactly a vitamin but a set of unsaturated essential fatty acids. This "vitamin" is recommended to treat problems of dry skin, eczema and scarring, so you could say that it is the repair component.

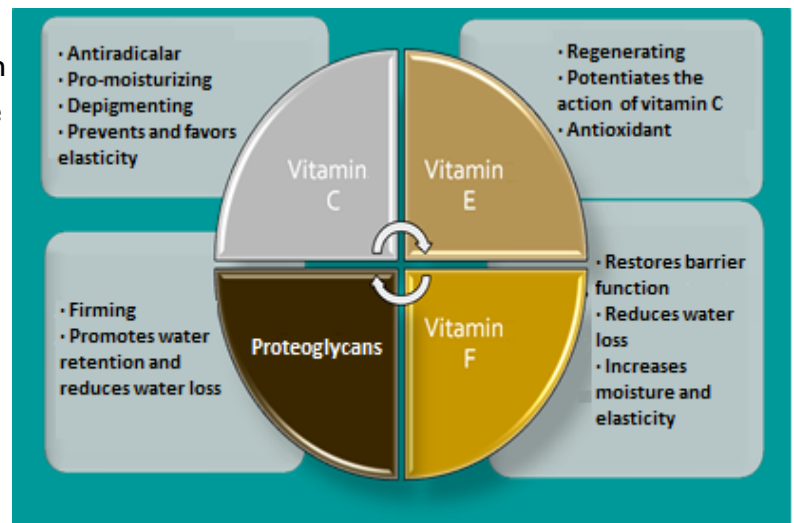

Proteoglycans

Proteoglycans are large complex molecules with the ability to repair epidermal cells and enhance connective tissue metabolism, arguably this is the firming component. In addition they favor the retention of water by the skin so that the skin does not lose hydration easily.

OUR MULTIVITAMINIC SERUM

- ♦ The main components of multivitamin serum are vitamin C, E and F, reinforced with the moisturizing action of proteoglycans. The synergy of these ingredients brings light to the skin and improves its appearance.

A regenerative serum multivitamin, non-comedogenic and with great power of penetration. As a carrier of all these components has been incorporated in the formula propyleneglycol, one of the most effective excipients that allows the penetration of the active ingredients into the skin.

- ♦ It has super moisturizing, repairing and firming properties.
- ♦ It is indicated for mature and dull skins, with signs of fatigue or irregularities of pigmentation or texture and for atopic skin with problems of dryness and eczema. Suitable for normal, dry and very dry skins.

How to use:

It is recommended to apply morning and evening, alone or accompanied by a treatment cream.

Our Products

In our company we only use simple, efficient and recyclable packaging with a clean and functional design and concentrate our efforts and costs on what is truly important for your skin: the quality of the ingredients and the production processes.
